

nuWARP PCI Vulnerability Scanning Service

Protecting your customers' data throughout the sales process and beyond is of utmost importance, particularly when processing payment cards. But how do you ensure that your systems are indeed safe for your customers to input their details?

- The Payment Card Industry is concerned with the security of processes that collect, store, process and transmit credit and debit cardholder data.
- The nuWARP is certified by the Payment Card Industry as an independent organization able to validate adherence to the Payment Card Industry Data Security Standard.
- The nuWARP is an Approved Scanning Vendor certified by the Payment Card Industry to undertake vulnerability scans of cardholder data environments.
- To achieve and maintain its approval status, the nuWARP complied with a series of stringent requirements as defined by the Payment Card Industry Security Standards Council.
- The nuWARP, as a qualified Approved Scanning Vendor, is identified on the Payment Card Industry web site. The Payment Card Industry does not recognize any company excluded from this list.

nuWARP@ Northumbria Business Services

The nuWARP is the North East centre for the UK Government's Warning, Advice and Reporting Point. As a recognized national centre of excellence in digital security, the nuWARP provides a wide range of services, which can be tailored to your business' specific digital security needs.

- Filtered Warning Service: relevant digital security warnings
- Advice Brokering Service: information security advice and best practice
- Trusted Reporting Service: incident reports & training CPD
- Incident Response Service: independent solutions to security breaches

The nuWARP is able to offer numerous additional Managed Services, such as,

- Data Recovery: restoration of 'deleted' information, password recovery, etc
- Digital Forensics: acquisition of computer-based evidence
- Network Monitoring: in-depth analysis of network usage
- Policies & Procedures: development & implementation
- Expert Witness Service: evidence presentation

The nuWARP can also evaluate the vulnerability of your network, for example,

- Security Audits: evaluation of the organization's security policies and procedures
- Vulnerability Assessments: scanning networks for known security weaknesses
- Penetration Testing: examination & assessment of the whole security model

The nuWARP is a recognized independent commercial service, having over 20 years' combined experience in information security. All of our services and training is delivered by fully accredited staff who hold teaching and police qualifications.
